

KEY BENEFITS OF HP PROCURVE ONE AND AIRTIGHT PARTNERSHIP

- Industry’s best wireless security solution

- Comprehensive monitoring and protection against all wireless security threats

- Protection of confidential business data

- Compliance with data security standards such as PCI, Sarbanes-Oxley (SOX), HIPPA, GLBA and DoD Directive 8100.2

- Reduced Total Cost of Ownership by leveraging existing ProCurve Ethernet Switches

AirTight Networks & HP ProCurve ONE Alliance - Industry’s best wireless security solution partnership

AirTight® Networks’ partnership with HP ProCurve provides HP ProCurve customers with the industry’s best wireless security solution. As part of the HP ProCurve Open Network Ecosystems (ProCurve ONE) partnership, AirTight offers SpectraGuard® Enterprise, its industry- leading wireless intrusion prevention system (WIPS) to HP ProCurve customers. HP customers who have deployed ProCurve 5406zl, 5412zl, or 8212zl Ethernet switch can run AirTight’s SpectraGuard Enterprise server application on the ProCurve ONE Services zl module.

AirTight’s comprehensive wireless intrusion prevention solution detects and classifies all wireless assets in the air, simplifying the discovery, remediation and removal of all wireless threats. AirTight’s superior threat detection and blocking capabilities, granular location tracking of wireless threats, and minimal false alarms lowers the overall cost of ownership by creating a low touch, ‘lean back’ solution for wireless security. Compatible with any wireless infrastructure, HP ProCurve customers can leverage best-of breed security regardless of the WLAN deployed.

This combined solution consists of the following components –

- SpectraGuard Enterprise server application – deployed on the ProCurve ONE Services zl module (supported on the ProCurve 5406zl, 5412zl, and 8212 zl switches)
- Sensors – AirTight SpectraGuard SS-300-AT (802.11n) and SS-200-AT (802.11abg) sensors

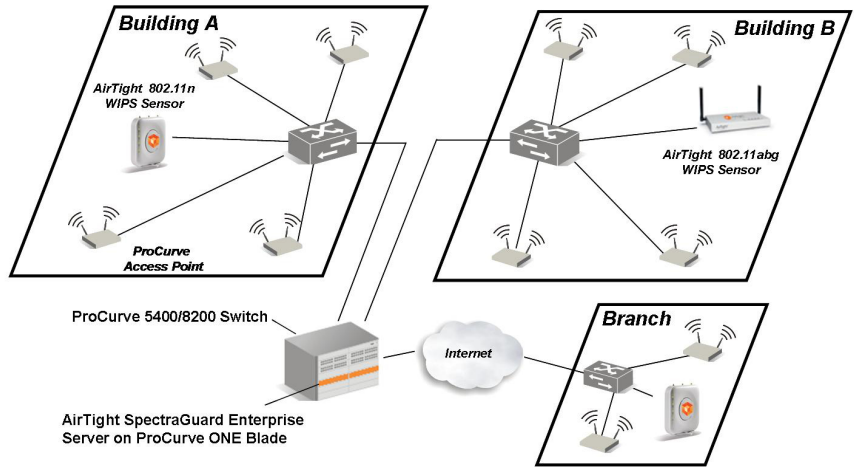

As shown in the deployment diagram (see next page), ProCurve switch (5406zl, 5412zl, or 8212zl) deployed at the edge, core, or in the datacenter can be equipped with an HP ONE services zl module to enable AirTight’s SpectraGuard Enterprise application. Customers who purchase this solution can download SpectraGuard Enterprise software application from the AirTight website and install it onto the ProCurve ONE services zl module. This eliminates the requirement to deploy a standalone appliance in your datacenter to enable WIPS – saving you rack space as well as eliminating extra power consumption requirements in the data center.

In addition to deploying SpectraGuard Enterprise server software on the

**ABOUT
AIRTIGHT NETWORKS**

AirTight Networks is the global leader in wireless security and compliance solutions providing customers best-of-breed technology to automatically detect, classify, locate and block all current and emerging wireless threats. AirTight offers both the industry's leading wireless intrusion prevention system (WIPS) and the world's first wireless vulnerability management (WVM) security-as-a-service (SaaS). AirTight's award-winning solutions are used by customers globally in the financial, government, retail, manufacturing, transportation, education, healthcare, telecom, and technology industries. AirTight owns the seminal patents for wireless intrusion prevention technology with 11 U.S. patents and two international patents granted (UK and Australia), and more than 25 additional patents pending. AirTight Networks is a privately held company based in Mountain View, CA. For more information please visit www.airtightnetworks.com

For detailed information on SpectraGuard Enterprise WIPS Capabilities, please refer to www.airtightnetworks.com/home/products/spectraguard-enterprise.html

ProCurve switch, customers need to deploy sensors across campus buildings to provide appropriate RF coverage, ensuring all wireless security threats are detected and dealt with immediately. HP ProCurve customers can leverage their existing ProCurve Access Points – ProCurve MSM320, MSM325, and MSM335 (802.11abg) Access Points or purchase stand-alone sensors from AirTight for non HP WLAN environments.

The SpectraGuard family of products includes:

- ◆ SpectraGuard Enterprise -- A comprehensive WIPS and performance management system that can operate either on an AirTight appliance or an HP ProCurve ONE Services module
- ◆ SpectraGuard Online -- An on-demand subscription service available in three modules – Vulnerability Assessment, Regulatory Compliance and Vulnerability Remediation
- ◆ SpectraGuard MNC -- A managed

network console providing the manager of manager functionality to scale wireless intrusion prevention solution deployments globally

- ◆ SpectraGuard SAFE -- Wireless security for mobile users
- ◆ SpectraGuard Planner -- Wireless LAN planning for coverage, performance and security

Customer support options from AirTight Networks include 24x7 phone & email support, access to the support website, bug fix software releases, major software releases, and return-to-factory or advanced hardware replacement for AirTight hardware.
